

To compare the resume with the job description, I will analyze the relevant skills, experiences, and qualifications based on the provided information.

Match Percentage: 85%

Missing Skills or Qualifications:

1. **Specific Frameworks/Libraries**: The job description does not specify the technologies related to full-stack development. The resume mentions Java but does not highlight frameworks like Angular, React, or Node.js, often required in full stack roles.
2. **Professional Experience**: The resume lacks any formal professional work experience in full-stack development or related roles.
3. **Advanced DSA Knowledge**: While the resume has a certification in Data Structures and Algorithms, there are no specific projects or experiences demonstrating extensive DSA application which could strengthen the candidate's fit.
4. **Version Control/Digital Tools**: There could be more emphasis on experience with tools commonly used in project management and development, such as JIRA, or continuous integration tools.
5. **Soft Skills**: Though the resume lists teamwork and collaboration, it may benefit from more concrete examples of leadership or problem-solving in high-stake environments.

Suggestions to Improve the Resume:

1. **Highlight Full-Stack Experience**: The candidate could include projects involving both front-end and back-end technologies, showcasing their ability to work as a full-stack developer. Adding more details about the front-end design and tools used would be beneficial.

2. ****Detail DSA Application****: Include projects or examples where Data Structures and Algorithms were applied practically in coding tasks or system design to demonstrate comprehensive understanding and application.

3. ****Technology Stack****: If applicable, add any frameworks or libraries relevant to the job for full-stack roles like React, Angular, or Node.js. Detailed knowledge of RESTful services or APIs would also be valuable.

4. ****Professional Experience****: Try to gain internship experience or contribute to open-source projects that can be added to the resume. Even brief internships or project work can significantly boost the candidate's viability.
